RAISING FILLET ŞARDON TELİ

Raising fillets continue to be increasingly important in finishing.

The **right fillet** will allow the customer to obtain **improved results** in the raising while at the same time decrease the number of passes required, thus **increasing production**.

To determine the exact raising fillet to be used it is necessary to know the material processed, the type and weight of the fabric that is to be worked on the raising machine. The

type of machine, the working width and the number of rollers (pile/counter) will determine the quantity necessary.

The choice of **foundation and steel wire used is fundamental** in the raising fillets. Tinned or stainless (inox) wire is used with wet fibers.

The angle, the treatment of the points, the grinding and polishing, and extra hardened points will give the raising fillet its final structure.

BIOTTI Card Clothing was founded back in 1879 and over the years has gradually become the most up-to-date and efficient manufacturer of flexible card clothing, metallic wire and raising fillets in Italy. The Company's success is due to the **constantly high quality** of its product which is made possible by using the **finest raw materials** combined with the **efficiency** and **modernity** of its production facilities and the professionalism of its employees, as well as the rigorous control of its finished product.

Once recognized as a leader in its field in Italy, the Company decided to expand into foreign markets and its products are now sold in all continents, in over **60 countries** around the world.

Today, thanks also to effective management, **BIOTTI Card Clothing** has been able to consolidate this success which allows it to confidently look to a future of continuing growth and development.
